EXPERIENCE

ELEPHANTAPPS

Remote, Turkey

Backend Developer

Jan 2023 • Present

- I'm currently working on a survey analytics application's backend side.
- I've worked with a **Serveless Node.js** application.
- We have optimized old **PostgreSQL** queries for a better response time.
- Worked with multiple **AWS services**.
- Updated the project's folder structure to make everything organized.

FLYING DONKEY IT (AU)

Remote, Australia

Full Stack Developer

July 2022 • Jan 2023

- Flying Donkey is a company based in Australia serving **SaaS** products to clients.
- I've worked on multiple projects and met with people around the world.
- I improved myself on backend technologies here with these projects.
- I've experienced the **code-first** approach.
- Worked on **C#** source generators for common libraries for multiple projects.
- Created **RxJs** pipelines with multiple asynchronous subscriptions.
- Worked on **GraphQL** project and created tests for them.
- In the other projects, I made code refactoring for the legacy database and codebase.
- Created services for file exporting.

ORION INNOVATION TURKEY

Remote, Turkey

Software Design Intern

Feb 2022 • Jun 2022

- I have developed side projects. After I learned how to work with a professional workflow and apply it.
- The first side project is a CRUD application with a **MERN** stack. This app allows users to dynamically create their own forms and manage them with a user management system.
- This project uses **JWT** authentication for user management. Thus the **API** operations pass through a middleware filter.
- In parallel, I used remote servers and deployed those applications on those servers with htaccess rules. Learned how to get over complex git problems and conflicts.
- The second project is creating API documentation with Swagger IO for an existing company project API. I have combined Swagger IO and React and filled that website with OpenAPI structured JSON files.

FREELANCE

Istanbul, Turkey

Freelancer

July 2020 • Feb. 2022

- Worked on small customer projects while I was a student. I've developed applications with **MERN** stack.

ROOTCON

Istanbul, Turkey

Voluntary Intern

July 2019 • Aug. 2019

- This internship was my first experience in this major. I have gained a lot of experience with Web APIs and mobile applications.
- Within this period, I developed a cross-platform phone book application with C# and Xamarin.

EDUCATION

Bartın University (Faculty of Engineering, Architecture, and Design)

Bartın, Turkey

Computer Engineering Bachelor's Degree. • **3.04 GPA**

Sep. 2018 • Jun. 2022

Architecture Base: Data Structures • Software Analyze and Design • Computer Architecture and Organization •

Operating System Structures • Machine Learning • Microprocessors

Development Based: Object Oriented Programming • Data Mining • Statistics with R • Database Management

System • Image Processing • Formal Languages and Automata • Robotics with ROS and Gazebo

Tugrul Bey Anatolian High School

Istanbul, Turkey

TECHNICAL SKILLS

Programming Skills

Javascript • C# • Typescript • PHP • Python • C/C++ • Dart • R

Technology Knowledge

- Web Development
 - Front-End:** React, Angular
 - Back-End:** Node.js • Serverless • .Net Core • EF Core • Express.js • PHP
 - Cloud:** AWS
 - Database:** MySQL • PostgreSQL • MongoDB • Firebase • GraphQL
 - Testing:** Jasmine • NUnit • Xunit
 - Styling:** Bootstrap4 • CSS3 • TailwindCSS • Styled Components
- Mobile App Development
 - Flutter • Kotlin • Android

Project Management / Design Tools

Git • Jira • Miro • Docker • Azure

LANGUAGES

English • Professional working proficiency **Turkish** • Native

CERTIFICATES

Developer Multicamp Flutter Camp • Google Developer Group

Dec. 2020

Android Bootcamp Turkey • Android Study Jams program GDG Turkey
